

# Can you achieve high yields using **IPM?**

The CottonInfo **IPM** workshop series

**CottonInfo & CRDC are hosting a series of IPM workshops in Nov-Dec, looking at managing pests using IPM while achieving high cotton yields.**

Leading industry experts, including Dr Lewis Wilson of CSIRO, will deliver this series of workshops, stressing the relevance of IPM in today's cotton farming systems.

Lewis will be joined by a number of other researchers - talking early season pest management, specific local pest control issues, and cotton physiology.

Local growers and consultants will speak about their experiences in managing pests while achieving high yields. The workshops will also feature a field walk and beatsheet demonstration.

## **DATES & DETAILS:**

### **WARREN: MONDAY 21 NOV**

'Auscott', Warren  
9am-12pm (lunch to follow)  
Call Amanda Thomas - 0417 226 411

### **DARLINGTON POINT: MONDAY 21 NOV**
