This 1-day course is presented by the Australian Sunflower Association (ASA), providing the latest information on plant growth and development, agronomy, pests, weeds and disease, harvest, storage and marketing.

The course is designed to provide farmers, agronomists and advisors with both the technical knowledge and practical skills required to achieve more reliable and profitable sunflower production. The expert presenters will provide the science and reasoning behind current Best Management Practice and an update on the latest research and advancements in the sunflower industry.

A comprehensive manual is provided exclusively to course participants.

Participants will have the option to provide their name and contact details to be added to the Sunflower Agronomist list on the Better Sunflowers website.

The nine topics covered by the course are:

- Plant growth and development and agronomy
- New varieties
- Weeds
- Insects
- Disease
- Storage and drying
- Harvesting
- Marketing
- Grower/agronomist experience (gross margins and rotation benefits)
