

# GRDC NORTHERN PULSE CHECK

GRDC welcomes all involved in the grains industry to the:

## GRDC Northern Pulse Check bus tour

**Location:** Lupins for Life, Jindera, and New Edge Microbeals, Albury

**Date:** 9 March 2020

**Time:** Depart Griffith Tourist Info Centre, Banna Ave, 7am, return 5pm

- “Lupins for Life”- tour the mill and hear how the Drew family developed this true paddock to plate proudly local business, “selecting only premium Australian sweet white lupins - a better tasting, higher protein and fibre legume”
- Mark Richards, DPI Wagga Pulse research agronomist- update on current trials, previous trial key messages, lessons learned and looking to the future trial program and the direction of breeding release compared to the main stream varieties.
- Adam Dellwo, Elders Agronomist will cover all the pre-season checks and the “need to knows” for the upcoming season.
- New Edge Microbials, Albury for lunch followed by a site tour and update of their lab. New Edge Microbials specialises in the production of nitrogen fixing legume inoculants, covering all major crop types grown from strains held by the Australian Inoculates Research Group (AIRG). New Edge Microbials also stands as the custodian of Rhizobium cultures for a number of smaller, specialised crops and pasture varieties.

The GRDC Northern Pulse Check project seeks to support and develop strong profitable pulse production systems across the GRDC Northern Region. It seeks to engage with grower, researcher, and industry stakeholders to encourage greater sharing of information, through a range of pulse related extension and communications activities.
