

# GRDC NORTHERN PULSE CHECK

**GRDC**  
GRAINS RESEARCH  
& DEVELOPMENT  
CORPORATION

**GRDC and IREC** welcomes all involved in the grains industry to the:

## GRDC Northern Pulse Check Grain Storage Workshop

**Location:** "Woodlands" Sturt Highway, Darlington Point NSW

**Date:** Friday, October 25 - 8.30am-11.30am

**Guest Speaker:** *Chris Warrick*

**Topic:** *Pre-Harvest planning - Managing pulses and grains in storage; Aeration cooling for pest and grain quality management; Preventing and managing pests; Considerations for expanding storage.*

Come along to this practical workshop where grain storage specialist Chris Warrick will help you prepare for successful on-farm storage. Chris will cover best practice management for storing pulses and provide tips for preventing and managing insects in different types of storages. Chris is national coordinator for the GRDC Grain Storage Extension Project and has been delivering information on grain storage to growers for 10 years.

The GRDC Northern Pulse Check project seeks to support and develop strong profitable pulse production systems across the GRDC Northern Region. It seeks to engage with grower, researcher, and industry stakeholders to encourage greater sharing of information, through a range of pulse related extension and communications activities.
