

# GRDC NORTHERN PULSE CHECK

GRDC welcomes all involved in the grains industry to

## Risks and Rewards of Irrigated Pulse Crops

**Date:** Monday 22 March 2021

**Time:** 9.00am-10.30am

**Meeting:** Zoom meeting

Join the conversation about how pulse crops fit into cropping rotations, what are the risks and rewards? How can you economically reap the rewards that pulses offer in the system.

### Guests Speakers and Topics

#### Economic risk analysis of pulse rotations

Richard Saunders, Pinion Advisory

Richard will use local data in a risk analysis tool to highlight and discuss the economics of using pulses. How can you assess the risks and make informed decisions about maximizing returns.

#### Risks and rewards of pulses in the rotation

Paul McIntosh, Pulse Australia

From an agronomy perspective what do you need to be aware of with pulses in the rotations? Paul will highlight some of the risks in terms of disease and the rewards in soil health.

#### Rates and target plants, what's the latest from local research?

Ben Morris, FAR Australia

Hear the latest research results about optimal sowing rates and target plant numbers to maximise yield.
